Outdoor sensor for air quality

Datasheet

Subject to technical alteration Issue date: 16.03.2018 • A001

nonnort

Application

Sensor for outdoor CO2 measurement: cold rooms, greenhouses, production plants and warehouses. With a mix output, a mixture of CO2 and VOC signals can be realized. The mixing ratio can be configured with the USE app. Designed for outdoor mounted applications with 0..10 V or 4..20 mA output.

Types Available

Outdoor sensor CO2 + VOC oder Mix - aktiv 2x 0..10 V | 2x 4..20 mA

LA+ CO2+VOC VV LA+ CO2+VOC AA

Security Advice – Caution

The installation and assembly of electrical equipment should only be performed by authorized personnel.

The product should only be used for the intended application. Unauthorised modifications are prohibited! The product must not be used in relation with any equipment that in case of a failure may threaten, directly or indirectly, human health or life or result in danger to human beings, animals or assets. Ensure all power is disconnected before installing. Do not connect to live/operating equipment.

Please comply with

- Local laws, health & safety regulations, technical standards and regulations
 - Condition of the device at the time of installation, to ensure safe installation
- This data sheet and installation manual

Notes on Disposal

As a component of a large-scale fixed installation, Thermokon products are intended to be used permanently as part of a building or a structure at a pre-defined and dedicated location, hence the Waste Electrical and Electronic Act (WEEE) is not applicable. However, most of the products may contain valuable materials that should be recycled and not disposed of as domestic waste. Please note the relevant regulations for local disposal.

Information about Indoor Air Quality CO₂

EN 13779 defines several classes for indoor air quality:

Category	CO ₂ content above the content in outdoor air in ppm		Description
	Typical range	Standard value	
IDA1	<400 ppm	350 ppm	Good indoor air quality
IDA2	400 600 ppm	500 ppm	Standard indoor air quality
IDA3	6001.000 ppm	800 ppm	Moderate indoor air quality
IDA4	>1.000 ppm	1.200 ppm	Poor indoor air quality

Information about Self-Calibration Feature CO₂

All gas sensors are subject to drift caused by components. This fact results generally in the need to recalibrate the sensors regularly.

With dual channel technology Thermokon integrates automatic self-calibration for different fields of operation. In contrast to common used ABC-Logic sensors with self-calibration dual channel are suitable for applications operating 24 hours, 7 days a week as for example hospitals.

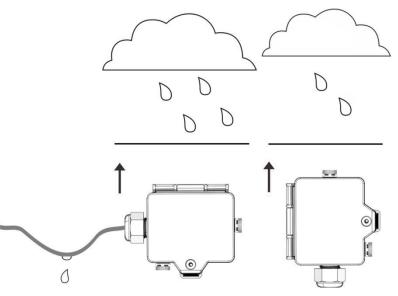

Manual calibration is not necessary!

Technical Data

Measuring values	CO2, VOC				
Output voltage	$2x$ 010 V or 05 V, configurable via jumper, min load 10 k Ω (live-zero configuration via Thermokon USEapp)				
Output ampere (type-dependent)	AA 420 mA, max. load 500 Ω				
Power supply (type-dependent)	VV 1535 V = or 1929 V ~ SELV	AA 1535 V = SELV			
Power consumption	max. 2,5 W (24 V =) 4,3 VA (24 V ~)				
Measuring range CO2	02000 ppm (Standard), 05000 ppm (optionally configured via Thermokon USEapp)				
Accuracy CO2	±50 ppm +3% of reading (typ. at 21 °C, 50% rH)				
Calibration	self-calibration, Dual Channel				
Sensor	CO2 sensor NDIR (non-dispersiv, infrared)	VOC sensor (heated metal oxide semiconductor)			
Enclosure	enclosure USE-M, PC, pure white, with removable cable entry				
Protection	IP65 according to EN 60529	according to EN 60529			
Cable entry	M16, for wire max. Ø=8 mm				
Connection electrical removeable plug-in terminal, max. 2,5 mm²					
Ambient condition0+50 °C, max. 85% rH short term condensation					
Mounting installation is also possible using mounting base					
Notes	mixed gas sensors detect gases and vapours which can be oxidised (burnt): Body odours, tobacco smoke, exhalations emitted by materials (furniture, carpets, paint, glue)				

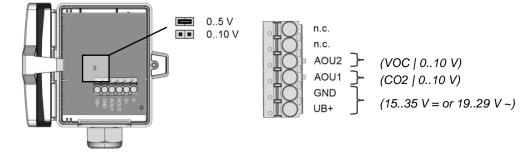

Mounting Advices

In case of outdoor installation avoid direct rain and sun contact. Probably use sun respectively rain protection. Cable entry from bottom or side. For side cable routing set loop so that precipitation can drain defined. Observe permissible ambient condition.

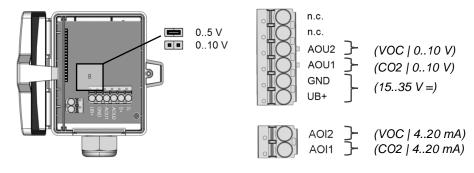

Connection Plan

LA+ CO2+VOC VV

LA+ CO2+VOC AA

Configuration (only possible with type LA + CO2 A)

The Thermokon bluetooth dongle with micro-USB is required for communication between USEapp and USE-M / USE L (Item No..: 668262). Commercial bluetooth dongles are not compatible.

Application-specific reconfiguration of the devices can be carried out using the Thermokon USEapp. The configuration is carried out in the voltage-supplied state.

The configuration-app and the app description can be found in the Google Play Store or in the Apple App Store.

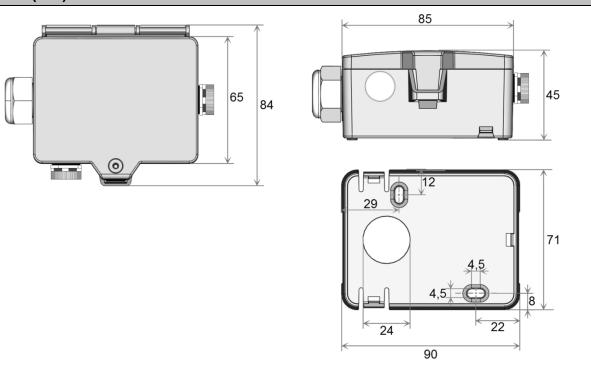

Application notice

The housing cover must be completely closed in order to ensure the accuracy and reproducibility of the measured values during a test or service log via USEapp.

The Bluetooth dongle snaps into the socket easily. When removing, please fix the plug-in card (option PCB) so that it is not unintentionally pulled out.

Dimensions (mm)

Accessories (included in delivery)	
Mounting base Mounting kit universal • Cover screw + screw cover• 2 Rawlplugs • 2 Screws (countersunk head) • 2 Screws (rounded head)	Item No. 631228 Item No. 698511

Accessories (optional)

M16 Sealing inserts cable entry (packaging unit 10 pcs.)

for wire with Ø	3 mm	5 mm	7 mm	8 mm
Item No	641036	641012	639248	641340
